

TIE DYE SHOES

Items Needed:

- White Canvas Shoes
- 91% isopropyl Alcohol
- Fine Tip Permanent Marks
- Spray Bottle
- Painters tape or Masking tape

Step One:

Cover the sole of the shoe in tape, I used painters tape you can also use masking tape. I took the shoelaces out of the shoes but some people also color those.

Step Two:

Use colorful permanent markers to make a design, I let my daughter just color them.

I have also seen different design ideas with stars or spirals to give it a more tie dye look. Included is an example from pinterest.

Step Three:

Once finished coloring put rubbing alcohol into a spray bottle and spray the shoes so that the markers run together. I had to soak the shoes to get the ink to start spreading.

Step Four:

Take the tape off your shoes and wear!
